

A Q-space sampling

B Acquisition overview

Numbers above markers: $b = 0$ volumes, or unique DW directions ($\times$ stored repeats).

Lambert azimuthal equal-area (upper hemisphere; antipodes folded). Points are unique non-zero directions from a representative subset of $b = 0$ reverse-PE references not shown as shells: gsld_75TE_PA_3b0 (PA, 5 $b = 0$); resolve_3scan_trace_tra_p3_160_1.4iso_PA (PA, 3 $b = 0$).

16 less frequent variants (63 series) are listed in dwi_protocol_summary.tsv.

● $b = 0$ volumes ● $b = 2000$ dirs
● $b = 1000$ dirs ◆ trace-weighted
